

Personal Teaching™

Empower Teachers and Students — Wireless, Digital, Connected!

- ◆ Teachers send assignments, tests, and materials to their students, wirelessly and know the on-going status of what and how each student is doing, teaching digitally in a **group** or **individual** mode.
- ◆ Students use **SchoolWork®** on their laptop or handheld computer to view the materials, complete their assignments or tests in class or at home and submit the finished work back to the teacher already scored.
- ◆ Teachers can distribute **digital** textbooks, multi-media, images, presentations—their own materials, open and public materials, or licensed materials.
- ◆ Students go beyond a computer self-study mode, with **teachers directing** them. Make your existing laptops, iPads, or handheld computers effective — **make digital effective for teachers & students!**
