### Position Inventory

Ascent Position Control primarily focuses on simplicity and ease of use, making Position Inventory management more streamlined and useful. Major new functions are:

- User location restrictions pre-filters records. User only allowed to view records for locations he/she is authorized to view.
- Multiple views of the data: by location, position, employee, account number.
- View statistics on positions: by headcount or FTE.
- Multiple search capabilities: employee, job code, position/vacancy number, account number.
- On screen reports output to HTML, PDF or Excel Spreadsheet.
- New position transfer functionality.
- New unique, permanent position numbering system.

All of these features in an easy to use browser environment makes this Position Inventory maintenance program highly productive for your HR employees to use.

Select	Location	Position Title	Grade Range	Filled	Vacant	Inactive	Request	Actions
<input type="checkbox"/>	013	ACCOUNTANT	PK - KK	0	1	0	0
