Classroom Attendance

The Classroom Attendance program simplifies the process of recording student attendance, saving you time and increasing the accuracy and availability of student attendance records. This application runs in real-time on the IBM™ iSeries allowing attendance to be available for office use immediately. No more scanners, scan forms, ink, and paper- saving District funds. Teachers do not have to bother with attendance forms and timely trips to the office, allowing more time for instruction. There are basically five steps in recording attendance: 1. Go to the Ascent Web link and log in. 2. Go to the program menu screen and select the attendance program. 3. Select the date and class. 4. Enter attendance information. 5. Save your entries.

Working Together Works!
